

ABOUT OMEGICA SERIES

Omega-3 fatty acids are essential nutrients known for their numerous health benefits, including supporting heart health, brain function, and reducing inflammation. They are commonly consumed in two primary forms: oil-based (liquid oils and soft gels) and dry formulations (powders, tablets, and encapsulated dry forms).

Here are the advantages of using dry omega-3 compared to omega-3 oil:

Reduced oxidation: dry omega-3 formulations are less susceptible to oxidation, a process that can degrade the quality of omega-3 oils and produce unpleasant odors and tastes. The dry form protects the fatty acids from exposure to air and light, which are primary catalysts for oxidation.

Longer shelf life: due to their stability, dry omega-3 products often have a longer shelf life compared to oil-based supplements, reducing the risk of consuming rancid oils.

Improved taste and odor: dry omega-3 supplements generally have a neutral taste and lack the fishy aftertaste commonly associated with fish oil supplements. This makes them more palatable for individuals sensitive to strong flavors or odors.

No fishy burps: the encapsulation techniques used in dry formulations can prevent the release of fishy odors in the stomach, reducing the likelihood of “fishy burps” after consumption.

No mess or leakage: unlike oil-based supplements that can leak or spill, dry forms eliminate the risk of messes, ensuring clean and hassle-free handling.

Enhanced absorption and bioavailability: OMEGICA supplements utilize advanced technologies to enhance the absorption of omega-3 fatty acids in the body. These techniques can protect the fatty acids through the digestive tract, releasing them where they are most effectively absorbed. OMEGICA controlled-release formulations can ensure that omega-3 fatty acids are delivered over an extended period, potentially improving their efficacy.

Accurate dosing: OMEGICA formulations allow for precise measurement of omega-3 content per serving, ensuring consistent intake and making it easier to follow specific dosage recommendations.

Reduced digestive discomfort: OMEGICA supplements are gentle on the stomach. Some individuals may experience gastrointestinal discomfort when consuming oil-based omega-3 supplements. Dry forms can be easier on the digestive system, reducing the risk of upset stomach, nausea, or diarrhea.

Lower allergen risk: OMEGICA formulations are processed to remove proteins that may cause allergic reactions in sensitive individuals, whereas fish oils may retain trace amounts of fish proteins.

OMEGICA omega-3 supplements offer several advantages over traditional oil-based forms, including enhanced stability, improved taste, convenience, and potentially better absorption. They provide a versatile and user-friendly option for individuals seeking to incorporate omega-3 fatty acids into their diet without the drawbacks associated with omega-3 oils.

OMEGICA OM1

MAIN APPLICATION: OMEGICA OM1 is a comprehensive supplement formulated to support cardiovascular and metabolic health. Combining the potent benefits of omega-3 fatty acids (DHA and EPA), antioxidants, herbal extracts, and essential vitamins, this formula aims to promote healthy blood pressure, optimal triglyceride levels, arterial health, and overall heart function. It also provides support for metabolic conditions such as diabetes.

Key benefits:

- supports healthy blood pressure
- promotes optimal triglyceride levels
- aids in maintaining arterial health
- supports normal heart rhythm
- provides antioxidant protection
- assists in managing metabolic health

Active ingredients:

- Omega-3 (DHA+EPA)
- Liposomal astaxanthin
- Liposomal hesperidin
- Liposomal niacin (vitamin B3)
- Liposomal quercetin
- Liposomal vitamin D3
- Liposomal vitamin K2
- Phytosomal Dong quai (*Angelica sinensis*) extract
- Phytosomal Galangal (*Alpinia galanga*) extract
- Phytosomal Gotu kola (*Centella asiatica*) extract
- Phytosomal Hawthorn (*Crataegus laevigata*) berry extract
- Phytosomal Rutin
- Phytosomal Sage (*Salvia miltiorrhiza*) extract

OMEGICA OM1

Omega-3 Fatty Acids (DHA + EPA) are essential fatty acids known for supporting heart health by reducing triglycerides, lowering blood pressure, and decreasing plaque buildup in arteries.

Astaxanthin is a powerful antioxidant that protects cells from oxidative damage, supports cardiovascular health, and may improve lipid profiles.

Dong Quai (Angelica sinensis) is traditionally used to improve blood circulation and reduce blood clotting.

Galangal (Alpinia galanga) is a medicinal herb that may support cardiovascular health through its anti-inflammatory and antioxidant properties.

Gotu Kola (Centella asiatica) is known for improving circulation and strengthening blood vessels, potentially reducing arterial plaque buildup.

Hawthorn Berry (Crataegus laevigata) is traditionally used to support heart health by improving blood flow and strengthening the heart muscle.

Hesperidin is a citrus bioflavonoid that may help improve blood vessel function and reduce inflammation.

Niacin (Vitamin B3) supports cardiovascular health by helping to manage cholesterol levels and promoting healthy circulation.

Quercetin is an antioxidant flavonoid that may reduce inflammation and support healthy blood pressure levels.

Rutin is a bioflavonoid that supports blood vessel strength and flexibility.

Sage (Salvia miltiorrhiza), also known as Red Sage or Danshen, is used in traditional medicine to support cardiovascular health by improving circulation.

Vitamin D3 supports overall health, including cardiovascular function, and may help regulate blood pressure.

Vitamin K2 is essential for calcium regulation, helping to prevent calcium buildup in arteries and supporting bone health.

How OMEGICA OM1 works

OMEGICA OM1 combines these potent ingredients to:

- Promote Heart Health

Omega-3 fatty acids reduce triglyceride levels and support normal heart rhythm. Hawthorn and Sage improve circulation and strengthen heart function.

- Support Vascular Health

Hesperidin, Rutin, and Gotu Kola enhance blood vessel integrity and flexibility. Vitamin K2 prevents arterial calcification by regulating calcium deposition.

- Provide Antioxidant Protection

Astaxanthin, Quercetin, and Galangal combat oxidative stress, reducing damage to heart and vascular tissues.

- Enhance Metabolic Function

Niacin aids in cholesterol management. Vitamin D3 supports glucose metabolism and insulin sensitivity.

Why Choose OMEGICA OM1

- Comprehensive Cardiovascular Support

Addresses multiple aspects of heart and metabolic health in one formula.

- High-Quality Ingredients

Utilizes premium, bioavailable forms of each nutrient for maximum effectiveness.

- Scientifically Backed

Ingredients selected based on clinical research and traditional use.

- Convenient and Easy to Use

Incorporates seamlessly into daily wellness routines.

OMEGICA OM2

MAIN APPLICATION: OMEGICA OM2 is a specialized supplement formulated to provide potent anti-inflammatory support for individuals experiencing joint inflammation, arthritis, and asthma. By combining the benefits of omega-3 fatty acids (DHA and EPA) with a synergistic blend of herbal extracts, antioxidants, and essential compounds, this formula aims to reduce inflammation, alleviate discomfort, and promote overall joint and respiratory health.

Key benefits:

- reduces joint inflammation and pain
- alleviates symptoms of arthritis
- supports respiratory health in asthma
- enhances joint mobility and flexibility
- provides antioxidant protection
- promotes overall anti-inflammatory effects

Active ingredients:

- Omega-3 (DHA+EPA)
- Liposomal curcumin (*Curcuma longa*)
- Liposomal ginger (*Zingiber officinale*)
- Liposomal piperine (*Piper nigrum*)
- Nanomicronized Hyaluronic acid
- Nanomicronized MSM (methylsulfonylmethane)
- Phytosomal Boswellia (*Boswellia serrata*) extract
- Phytosomal Cinnamon (*Cinnamomum verum*) extract
- Phytosomal Feverfew (*Tanacetum parthenium*) extract
- Phytosomal Peony (*Paeonia lactiflora*) extract
- Phytosomal Willow bark (*Salix alba*) extract

OMEGICA OM2

Omega-3 Fatty Acids (DHA + EPA) are essential fatty acids known for their anti-inflammatory properties, helping to reduce joint inflammation and improve respiratory function.

Boswellia (Boswellia serrata) inhibits pro-inflammatory enzymes, reducing inflammation and pain in joints.

Cinnamon (Cinnamomum verum) contains potent antioxidants and anti-inflammatory compounds that may help reduce joint swelling and improve respiratory health.

Curcumin (Curcuma longa) is known for its strong anti-inflammatory and antioxidant effects, supporting joint and respiratory health.

Feverfew (Tanacetum parthenium) traditionally used to reduce inflammation and alleviate pain associated with arthritis.

Ginger (Zingiber officinale) possesses anti-inflammatory properties that can alleviate joint pain and improve symptoms of asthma.

Hyaluronic Acid is a natural component of joint fluid that helps lubricate joints, improving mobility and reducing discomfort.

MSM (Methylsulfonylmethane) is an organic sulfur compound that supports joint health by reducing inflammation and oxidative stress.

Peony (Paeonia lactiflora) is used in traditional medicine to reduce inflammation and modulate immune responses.

Piperine (Piper nigrum) enhances the bioavailability of curcumin and other nutrients, amplifying their anti-inflammatory effects.

Willow Bark (Salix alba) contains salicin, a natural compound similar to aspirin, providing pain relief and reducing inflammation.

How OMEGICA OM2 works

OMEGICA OM2 combines these potent ingredients to:

- Reduce Inflammation

Omega-3 fatty acids, Boswellia, and Curcumin work synergistically to inhibit inflammatory pathways.

- Alleviate Pain and Discomfort

Willow Bark and Feverfew provide natural analgesic effects, easing joint and muscle pain.

- Support Joint Health

Hyaluronic Acid and MSM promote joint lubrication and cartilage health, enhancing mobility.

- Enhance Nutrient Absorption

Piperine increases the effectiveness of Curcumin and other herbal extracts.

- Improve Respiratory Function

Ginger and Cinnamon may help reduce airway inflammation, supporting individuals with asthma.

Why Choose OMEGICA OM2

- Comprehensive Anti-Inflammatory Support

Addresses both joint and respiratory inflammation in one holistic formula.

- High-Quality Ingredients

Utilizes premium, bioavailable forms of each nutrient for maximum effectiveness.

- Scientifically Backed

Ingredients selected based on clinical research and traditional use.

- Convenient and Easy to Use

Incorporates seamlessly into daily wellness routines.

OMEGICA OM3

MAIN APPLICATION: OMEGICA OM3 is a specialized supplement formulated to support brain health and cognitive function. Combining the benefits of omega-3 fatty acids (DHA and EPA) with a synergistic blend of herbal extracts, amino acids, vitamins, and minerals, this formula aims to assist individuals seeking support for cognitive concerns such as Alzheimer's disease, dementia, depression, attention deficit hyperactivity disorder (ADHD), and migraines.

Key benefits:

- supports cognitive function and memory
- enhances mental clarity and focus
- promotes neurotransmitter balance
- provides neuroprotective effects
- supports mood and emotional well-being
- assists in reducing migraine frequency

Active ingredients:

- Omega-3 (DHA+EPA)
- Liposomal Bacopa (Bacopa monnieri)
- Liposomal Ginkgo biloba
- Liposomal magnesium
- Liposomal vitamin B12
- Nanomicronized Choline bitartrate
- Nanomicronized Glycine
- Nanomicronized L-carnitine
- Phytosomal Ashwagandha (Withania somnifera) extract
- Phytosomal Korean (Panax ginseng) ginseng extract
- Phytosomal Lion's mane (Hericium erinaceus) mushroom extract

OMEGICA OM3

Omega-3 Fatty Acids (DHA + EPA) are essential fatty acids crucial for brain health, supporting neuronal function, cognitive performance, and mood regulation.

Ashwagandha (Withania somnifera) is an adaptogenic herb known to reduce stress and anxiety, improve memory, and enhance overall brain function.

Bacopa (Bacopa monnieri) is traditionally used to enhance memory, learning, and concentration by supporting neuronal communication.

Choline bitartrate is a vital nutrient that supports the synthesis of acetylcholine, a neurotransmitter important for memory and muscle control.

Ginkgo Biloba may improve blood flow to the brain, enhancing cognitive function and memory.

Glycine is an amino acid that acts as a neurotransmitter in the central nervous system, supporting cognitive function and mood.

Korean Ginseng (Panax ginseng) is known for its neuroprotective properties, it may enhance cognitive performance and reduce mental fatigue.

L-Carnitine supports energy production in brain cells, potentially enhancing cognitive function.

Lion's Mane Mushroom (Hericium erinaceus) may stimulate nerve growth factor (NGF) production, supporting neuronal health and cognitive function.

Magnesium is an essential mineral involved in numerous neurological processes, including neurotransmitter release and synaptic plasticity.

Vitamin B12 is important for maintaining the health of nerve cells and supporting the synthesis of neurotransmitters.

How OMEGICA OM3 works

OMEGICA OM3 combines these potent ingredients to:

- Enhance Cognitive Function

Omega-3 fatty acids, Bacopa, and Ginkgo Biloba support memory, focus, and overall cognitive performance.

- Support Neurotransmitter Balance

Choline, Glycine, and Vitamin B12 contribute to the synthesis and regulation of key neurotransmitters involved in mood and cognition.

- Promote Neuroprotection

Lion's Mane Mushroom and Ashwagandha may protect neurons from damage, supporting long-term brain health.

- Improve Mood and Emotional Well-being

Ashwagandha and Korean Ginseng help reduce stress and promote a positive mood.

- Boost Energy Metabolism in the Brain

L-Carnitine and Magnesium support energy production within brain cells, reducing mental fatigue.

- Assist in Reducing Migraine Frequency

Magnesium is known to help reduce the frequency and severity of migraines by supporting vascular health.

Why Choose OMEGICA OM3

- Comprehensive Brain Support

Addresses multiple facets of cognitive health in one convenient formula.

- High-Quality Ingredients

Utilizes premium, bioavailable forms of each nutrient for maximum effectiveness.

- Scientifically Formulated

Ingredients selected based on clinical research and traditional use.

- Enhanced Synergy

Combination of herbs, vitamins, and amino acids work together to support brain health.

- Convenient and Easy to Use

Incorporates seamlessly into daily wellness routines.

OMEGICA OM4

MAIN APPLICATION: OMEGICA OM4 is a specialized supplement formulated to support eye health and visual function. Combining the benefits of omega-3 fatty acids (DHA and EPA) with a synergistic blend of vitamins, minerals, and potent antioxidants, this formula aims to assist individuals seeking support for eye conditions such as dry eye and macular degeneration.

Key benefits:

- supports macular health and function
- provides antioxidant protection for the eyes
- helps maintain healthy vision
- reduces symptoms of dry eye
- protects against age-related eye conditions

Active ingredients:

- Omega-3 (DHA+EPA)
- Liposomal coenzyme Q10
- Liposomal lutein
- Liposomal resveratrol
- Liposomal vitamin A
- Liposomal vitamin C
- Liposomal vitamin E
- Liposomal zeaxanthin
- Liposomal zinc
- Nanomicronized Citicoline
- Nanomicronized Copper

OMEGICA OM4

Omega-3 Fatty Acids (DHA + EPA) are essential fatty acids that support the structural integrity of retinal cells and may reduce inflammation associated with dry eye.

Citicoline is a compound that may support visual function by enhancing retinal neurotransmission and protecting optic nerve health.

Coenzyme Q10 is an antioxidant that helps protect eye cells from oxidative stress and supports mitochondrial function.

Copper is an essential mineral involved in antioxidant enzyme systems that protect the eye from oxidative damage.

Lutein is a carotenoid concentrated in the macula that filters harmful blue light and acts as an antioxidant.

Resveratrol is a potent antioxidant that may protect retinal cells from oxidative stress and inflammation.

Vitamin A is essential for the maintenance of normal vision, particularly in low-light conditions.

Vitamin C is an antioxidant vitamin that supports the health of ocular blood vessels and connective tissues.

Vitamin E protects eye cells from oxidative damage by neutralizing free radicals.

Zeaxanthin along with lutein, accumulates in the macula to filter blue light and provide antioxidant protection.

Zinc is essential for transporting vitamin A from the liver to the retina to produce melanin, a protective pigment in the eyes.

How OMEGICA OM4 works

OMEGICA OM4 combines these potent ingredients to:

- Protect Against Oxidative Stress

Antioxidants like Vitamins C and E, Lutein, Zeaxanthin, Resveratrol, and Coenzyme Q10 help neutralize free radicals that can damage eye cells.

- Support Macular Health

Lutein and Zeaxanthin accumulate in the macula, filtering harmful blue light and reducing the risk of age-related macular degeneration.

- Enhance Visual Function

Omega-3 fatty acids support the structural integrity of retinal cells, while Citicoline may enhance optic nerve function.

- Maintain Healthy Vision

Vitamin A and Zinc play crucial roles in maintaining normal vision and protecting eye tissues.

- Reduce Dry Eye Symptoms

Omega-3 fatty acids may help improve tear production and reduce inflammation associated with dry eye syndrome.

Why Choose OMEGICA OM4

- Comprehensive Eye Support

Addresses multiple aspects of eye health in one convenient formula

- High-Quality Ingredients

Utilizes premium extracts and bioavailable nutrients for maximum benefit.

- Scientifically Formulated

Ingredients selected based on clinical research and traditional use.

- Enhanced Synergy

Combination of antioxidants, vitamins, and omega-3s work together to support optimal eye health.

- Convenient and Easy to Use

Incorporates seamlessly into daily wellness routines.
